

Spring - Summer Organizing Tips

It's been a long cold winter in Colorado and its time to embrace the warm weather and get organized to enjoy more time outdoors.

Bedrooms

1. Change to spring bedding and store the heavy quilts and comforters away for next winter. Wash or dry clean the bedding and store in a clean dry area for seasonal items.
2. If your mattress needs to be flipped now is the time.
3. Start to migrate heavy winter clothing to storage if it is something you will wear next season. If the item is not a favorite or has not been worn consider sharing it with someone else or donating.

Bathrooms

1. Review all prescriptions and remove the expired bottles.
2. Sort through make up and toss the old.
3. Put winter ointments and creams away and bring the sun screen and bug repellents to the front of the cabinet. Do inventory of what you need and add it to the shopping list so you have it when you are ready for that first picnic or hike of the season.

Family Rooms

1. Review books and DVD's that were used this winter. If they are favorites store them but if it is time to let them go share or trade them with friends or donate them to your favorite non-profit.
2. Time to switch out or wash the pillows and plump the cushions on the chairs and sofas.
3. Recycle old magazines and reading material.

Garage

1. Time to sweep the dirt out and put the snow shovels up and away.
2. Store the winter sports equipment and clothing away after cleaning and repairing any problems.
3. Take the bikes down, check the tires and get them fixed now so you are ready to go.

Vehicles

1. Take out the sand bags and extra weight you don't need for the spring and summer and improve gas mileage.
2. Ask the carpet cleaners to do the vehicle carpets and seats when the house carpeting is cleaned and save a trip.
3. Recycle old maps.
4. Verify the current insurance and registrations are easily available.
